

With the benefit of more than 20 years of experience in creating innovative Facilities Management software, our fmfirst® Estates CAFM software system has been designed to meet the ever-increasing challenges faced by today's estates and facilities management professionals.

## A Complete CAFM Software System

Benefit from maximum efficiency, productivity and cost savings from the multi-functional system design within our fmfirst® Estates application. fmfirst® Estates has evolved over many years to help with the various daily requirements in the facilities management world; modules within the application include Help-Desk, Task Management, Asset Management, Staff Management, Mobile and many more.

## SFG20 Integration

fmfirst® Estates can also be integrated with the SFG20 schedule listings; the definitive standard for planned maintenance. These SFG20 ready-programmed schedules will be automatically updated each time a revised SFG20 update is released. This will allow you to save time, energy and money whilst giving you peace of mind knowing that your facilities are being serviced to the latest standards.

## fmfirst® Estates Benefits

- Intuitive system design & functionality that simplifies user operation
- Comprehensive & user-definable PPM management
- Fully integrated CAFM software that can be used independently or along with our other fmfirst® applications
- We are ISO 9001:2015 and ISO 27001:2013 accredited to ensure the on-going provision of system quality, data security and compliance management

## fmfirst® Estates Key Modules
