

SFG20 Integration

The definitive standard for planned maintenance. Help keep your facilities up to date and reduce long-term costs with the SFG20 planned maintenance schedules. Asckey have partnered with BESA (Building Engineering Services Association) to become their first Approved Provider of SFG20. As a result, our fmfirst® Estates CAFM software solution can be supplied with the core SFG20 schedules pre-programmed as part of its PPM module.

An Essential Tool for Facilities Management

- 400+ maintenance schedules covering 60+ equipment types
- Help you stay compliant to the latest industry standards
- Lower maintenance, energy & replacement costs
- Integration with fmfirst® Estates allows for enhanced PPM functionality
- Schedules are updated automatically
- Our ISO9001 and ISO27001 accreditations ensure optimal levels of system quality, data security and compliance management.

Save Time, Energy & Money

With over 400 maintenance schedules covering over 60 equipment types, subscribers can choose the specific schedules they require for the buildings and assets they manage. The SFG20 schedules will give you the optimal maintenance instructions, frequencies and required skillsets for the work required.

This ensures that under and over-maintaining equipment and facilities are kept to a minimum resulting in overall reduced costs for your company as well as ensuring compliance with legislation and industry standards.
